Imagine a Day Without Water

Elementary School ART CONTEST

Call for entries

Could you imagine a day without water? It's hard to imagine even a single day without our world's most valuable resource.

Turn on the tap, and clean water flows out. Flush the toilet, and dirty water goes away. When you have reliable water service, you don't have to think about the infrastructure that brings water to your home or business and returns it safely to the environment – but you should. On Imagine a Day Without Water, we ask everyone to consider what their day would be like if they couldn't turn on the tap and get clean drinking water, or if you flushed the toilet and wastewater didn't go anywhere. What would that day be like? MWH is hosting an art contest for elementary school students to use their creativity and show us why they think water is valuable and what a day without water would look like.

MWH has partnered with Imagine a Day Without Water, a national education campaign put on by the Value of Water, to highlight how precious and essential water is to our world. Students through Grade 5 are encouraged to create a piece of art that details what a day without water would look like and why having clean water is so important to our world. Be creative – we would love to see your drawings, videos, and anything else you can think of. Entries can be emailed to community@**mwh**constructors.com or mailed to 8001 Arista Place, Suite 500, Broomfield, CO 80021. Please include your student name, grade, and school with your entry.

The first prize winner and their teacher will each win a $100 Visa gift card. Three runners-up and their teachers will each win a $50 Visa gift card! All our winners will also receive an age-appropriate book about the water cycle.

Teachers in and around the Denver/Boulder area – we can pick up entries from your classrooms! Just email us at community@**mwh**constructors.com to coordinate a pickup. Additional curriculum ideas to tie into the contest can be found here: https://imagineadaywithoutwater.org/resources-students.
